

Hymenoptera BioBlitz

**Monday-Wednesday
August 1-3, 2011**

Help us learn what Hymenoptera (bees, wasps, and ants) live in Great Basin National Park during a 48-hour intensive search!

You're invited!

Interested individuals and amateur and professional naturalists are welcome to participate. No experience is necessary. Dr. James Pitts from Utah State University will be our principal Hymenoptera expert.

Schedule for August 1-3:

Monday 9:00 AM: Hymenoptera workshop at Baker Hall in Baker, NV— Learn about natural history, collecting techniques, and more!

Monday 12 PM-Wednesday 12 PM: 48-hour BioBlitz—search all the corners of Great Basin National Park for interesting Hymenoptera

To participate:

Please email [Gretchen Baker@nps.gov](mailto:Gretchen_Baker@nps.gov) or contact one of the park visitor centers. Participants collect as much or as little time as they want during the 48 hour time period. Habitat data will be collected also to learn what areas the Hymenoptera prefer.
